Diamond and CBN Tools

Versatile program for all types of grinding tasks

Diamond and CBN tools according to standard FEPA for grinding carbide, ceramics, glass, HSS and other hard materials. The tools can be used for round-, flat- and internal grinding. For hard turning and high-speed milling of hard-free-cutting, we carry out the complete program of PCD and PKB tools and we can replatening all of these tools. Furthermore, the polycrystalline material also serves as wear protection.
